April 11, 2018, Gurugram**Press Release**

HeidelbergCement India Limited achieved 6.37x Net Water Positive

Water Reservoir in Narsingarh

HeidelbergCement India Limited has been certified as **6.37x Net Water Positive** by an independent certifying agency, TÜV SÜD. During FY 2016-2017, all the cement plants of the Company withdrew 1,093,332 kilo liters of water from various sources and harvested 6,965,000 kilo liters of water. This implies that the Company has given back 6.37 times water than it consumed.

This distinction has been possible due to the commitment of all its employees towards water conservation, health, hygiene and safety. The Company's multidimensional approach included diversion of rain water to reservoirs, installation of water harvesting systems, revival of bore wells, controlling seepage and educating everyone on water conservation.

HeidelbergCement's global philosophy of environment protection and conservation has been a driving force for its India operations. "Sustained commitment for conserving the water resources over the years has led to the Company achieve this distinction", said Mr. Jamshed N Cooper, Managing Director. This indeed is a proud moment for all of us at HeidelbergCement India as we are able to contribute positively to the Society. We are committed and aligned with HeidelbergCement Group's Sustainability Commitments 2030 covering water, air, land, occupational health and safety, circular economy, people and communities.

About HeidelbergCement India Limited:

HeidelbergCement India Limited (HCIL) is a part of HeidelbergCement Group, one of the leading building material companies in the globe. HCIL is one of the major cement players in Central India and has installed cement capacity of 5.4 million tonnes. The company has 4 manufacturing facilities namely, Narsingarh and Imlai, District Damoh (Madhya Pradesh), Jhansi (Uttar Pradesh) and Ammasandra, District Tumkur (Karnataka). The Company also has captive power generation capacity of ~ 12 MW through a Waste Heat Power Generation Plant at Narsingarh, which generates power by utilizing waste heat generated by the clinker lines of Narsingarh plant. The Company is marketing its cement under the flagship brand "Mycem" through its network of C&F Agents, dealers and distributors spread across Madhya Pradesh, Uttar Pradesh, Bihar, Uttarakhand, Karnataka and Kerala.
